DETAILED ACTION

Claim Objections

1. Claims 4-27 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot serve as a basis for another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-27 have not been further treated on the merits.

Claims 1-3 and 28-29 are under consideration in the instant office action

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, drawn to a polypeptide which possesses an activity of the β -secretase.

Group II, claim(s) 28, drawn to a method for detecting molecules.

Group III, claim(s) 29, drawn to a vector.

3. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the product recited in claim 1 was known in the prior art as indicated by the international search report (document WO 96 40885), therefore, it cannot serve as a unifying special technical feature. The "special technical features" means those technical features that define a contribution over the prior art. (See M.P.E.P. 1850.) Thus,

Art Unit: 1646

the apparent "special technical feature" of these claims cannot form the basis of unity of invention and the main invention which forms a single inventive concept is Group I, claims 1-3.

Groups II and III do not possess special technical features as set forth above. Note that PCT Rule 13 does not provide for multiple products or methods within a single application.

Accordingly, the instant claims are subject to restriction under 35 U.S.C. 121 only.

4. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not required one for the other in that the vectors of Group III are not required for the methods of Group II.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Olga N. Chernyshev whose telephone number is (703) 305-1003. The examiner can normally be reached on Monday to Friday 9 AM to 5 PM ET.
